NEWS

It was Ellars first time attending Bain Fallon and the 2026 conference didn't disappoint. We enjoyed catching up with clients across the four days and thank delegates for coming by the stand to say hello. Congratulation to Dr Katie Wilcox from Avenel Equine for winning our passport prize, kindly supported by Boehringer, Virbac, 4Cyte Equine, IAH and Troy. Congratulations to Dr Micki and Dr Angus from Central Equine for winning our accommodation voucher. A big thankyou to all who participated.

ELLAR SERVICE UPDATE

NEW PRODUCTS AND PRODUCT UPDATES

NEW - Numelvi®

Numelvi® is the only second-generation JAK inhibitor for dogs, representing an important advancement in the management of allergic skin conditions. It is indicated for the symptomatic treatment of pruritus (itch), inflammation, and clinical signs associated with allergic dermatitis, including atopic dermatitis.

This registration marks a significant step forward in bringing an up-to-date advancement to veterinarians and pet owners.

Available to preorder now.

NEW - Protech® Lepto 4 – Next Generation Leptospirosis Vaccine

Protech Lepto 4 has been developed to address the evolving epidemiology of canine leptospirosis in Australia and offers veterinary clinics a new standard of protection against this important zoonotic disease.

Key Product Benefits

Protech Lepto 4 delivers:

- Broad protection against four Leptospira serovars across four serogroups.
- Protection against the two most common serovars affecting Australian dogs, Copenhageni and Australis.
- Rapid onset of immunity following the primary vaccination course.
- Use from 7 weeks of age.
- An efficacy profile designed to help prevent or reduce mortality, clinical signs, infection, bacterial excretion, renal carriage and renal lesions associated with leptospirosis.

Protech Lepto 4 is expected to be available through Australia's veterinary wholesale network in Q4 2026

Available to preorder now.

Parnell Pet Care Range

Available to order now.

Zydax Gen II 20ml

Zydax (pentosan polysulfate sodium): a true Disease Modifying Osteoarthritis Drug (DMOAD) that has been clinically proven to improve activity impairment in dogs in just 28 days.

Glyde 60's and 120's

Glyde: the only nutraceutical that combines 3 proven ingredients to support normal joint health and function in dogs.

Seddex 20ml

Seddex (dexmedetomidine hydrochloride): a highly selective α_2 -agonist, providing reliable sedation and analgesia for a wide range of veterinary procedures.

Contrased 10ml

Contrased (atipamezole hydrochloride): a selective α_2 -antagonist that rapidly and effectively reverses the effects of dexmedetomidine.

Dechra New Products

Porus® One 30's x 6

This new multi-pack is intended for chronic patients and those requiring a more cost-effective solution via a bulk pack.

Cardisure® 3.5 mg/mL Oral Solution 42ml and 168ml

The new oral solution further complements the market-leading Cardisure tablets range, offering veterinarians increased flexibility when administering treatment to canine cardiac patients.

Available to order now.

New from AVet **Elevet+ Ceftiofur Sodium 4mg 80ml.**

elevet+ Ceftiofur Sodium Lyophilised Powder is indicated for the treatment of:

- Equine respiratory diseases, caused by organisms susceptible to ceftiofur.
- Bovine respiratory diseases caused by Mannheimia haemolytica, Pasteurella multocida and Haemophilus somnus.
- Canine urinary tract infections caused by ceftiofur sensitive pathogens.

Available to order now.
